Profile

Experienced Frontend Developer with 3+ years in the industry, proficient in HTML, CSS, and JavaScript, specializing in Angular framework. Strong focus on responsive design principles for seamless user experiences.

Committed to translating design concepts into visually engaging web applications. Emphasis on delivering clean and optimized code for superior user experiences.

Proven track record of designing, implementing, and testing web-based enterprise software front-ends, demonstrating expertise in Agile Scrum methodologies.

Excellent communication skills, both oral and written, with a commitment to continuous learning and skill development in line with evolving technologies and project requirements.

Strong knowledge on Algorithm & Data Structures.

Employment History

Software Engineer, IT Intellect Micro Solutions pvt ltd, Pune
DECEMBER 2020 — PRESENT

- Proficient in utilizing a robust tech stack, including HTML5, Angular, SCSS, Typescript, and ES6, with a focus on crafting innovative and efficient UI architectures
- Developed and maintained responsive web applications using Angular framework, ensuring seamless user experiences across multiple devices and browsers
- Developed and maintained software in multiple programming languages, such as JavaScript and angular
- Implemented clean and modular code structure, following best practices and coding standards to optimize application performance and maintainability
- Collaborated with cross-functional teams, including designers and backend developers, to translate UI/UX designs into functional and interactive front-end components.
- Conducted through testing and debugging to identify and resolve software defects, ensuring high-quality and bug-free codebase.
- Integrated RESTful APIs and third-party libraries into Angular applications, enabling efficient data retrieval and enhancing application functionality.

Google-Client

- Worked on an application called Barkeep which is a soft-phone client used by Agents to answer calls from customers

- Aligned projects with requirements and specifications to deliver above benchmark results.

- Wrote clean and dynamic code, leveraging expertise across multiple programming languages to meet diverse requirements.
